Press Release: HCM's New Secura™ Cables Support Video Applications over Twisted-Pair

Manchester, NH: HCM's new Secura™ cable was designed to support the power, control, and video requirements of today's security cameras and devices over one high-performance UTP cable. This innovative new cable features:

- Support of the latest IP camera technology
- Enhanced Category 6 transmission performance
- Operation over 100m horizontal cabling
- Meets Camera PTZ (pan-tilt-zoom) requirements
- DP-3 Compliant to UL 1690 for data processing cable
- Support of up to 30V AC and 60V DC at 80 A transmission
- 22 AWG twisted-pair construction

Video surveillance applications supported by Secura cables include: government and military facilities, airports, financial institutions, offices, universities and research laboratories, casinos, and hospitals.

Secura cables are packaged on 1,000 foot (305 m) reels and the standard jacket color is orange to identify support of video applications. Additional jacket colors are available upon request.

Part numbers for Enhanced Category 6 Secura cables are referenced below. Please contact your Customer Service Representative at info@hcm.hitachi.com or call 1-800-772-0116 for additional information.
