RACK TECHNOLOGIES

# Heavy Duty Rack

This 19" Open Frame Relay Rack is designed to securely mount the heavier networking equipment, routers, servers, and switches. Manufactured from extruded aluminum structural channel, the Rack Technologies Heavy Duty Rack offers universal EIA-compliant #12-24 tapped mounting holes, with RU markings conveniently silk-screened onto the frame. Assembly fasteners thread directly into tapped holes in the channels, allowing faster assembly and a self squaring design.

- **33% Thicker Material than our standard racks**

- **Convenient Rack Unit Markings silk screened on front and rear**

- **Self Squaring**

- **Faster assembly with threaded flange mounting holes**
