

# NEW Megger SCT2000 Network Cable Tester and snap on adaptor.

Megger SCT2000 Network Cable Tester

SCT Series Multimode & Singlemode Fiber Adapters

## Megger SCT2000 Network Cable Tester

The most intuitive and easy-to-operate LAN certification tester on the market today! How simple is that?

- 1 to 1,000 MHz frequency range. Certifies twisted pair to all approved ISO and TIA standards, including ISO Class F.
- Meets Level IV accuracy specifications.
- Powerful diagnostics locate link disturbances on each pair, displaying the size and distance to the disturbances in a straightforward manner, speeding link failure recovery.
- Unique "connector-less" recessed copper and fiber optic adapters eliminate virtually all potential adapter or tester damage...keeping your SCT on the job.
- Powerful SQL based certification management software allows quick organization, editing, viewing, printing, saving or archiving test results by job site, customer, campus building and more!

### The SCT Series Multimode & Singlemode Fiber Adapters

- Certify singlemode and multimode fiber optic links at 850, 1300, 1310 and 1550 nm wavelengths.
- Provide fully compliant Tier 1 Certification.
- Capabilities include length, loss and power measurements, power meter and light source.
- Perform bi-directional testing without swapping primary and secondary units.
- Integrated VFL for diagnosing link problems.
